

Sample Class Welcome Documents

We have built a system to allow you to do the things you normally would with a class. Having participated in dozens, if not well over one hundred training classes throughout his career, our founder understands the administrative and logistical burden developing an adult-learner oriented training session can be.

Through the Training Hub, you can build a full course schedule in a drag and drop form which allows you to move sessions around the page without the need to rewrite multiple day stacks. The Training Hub allows you to build tests and surveys that you can issue and are returned to you already graded and/or tallied. You can set up trainer only documents, pre-class documents, certificates, and many other functions you would expect to find in a fully structured course package.

Please let us know what you think of the Training Hub and what we can do to improve it for you.
